

Grazing Resiliency in the Bakken

Provides cost share on practices designed to increase the resiliency of ranch lands to weather droughts by implementing rotational grazing systems with fencing and water development support.

- Fencing provided to landowners at 60% cost-share payment based on NRCS cost-share payment rates.
- Water developments will use NRCS rates for agreement development but will pay 60% cost-share based on actual costs.
- The landowners will provide the remaining 40% cost-share on both fence and water.
- 10-year habitat agreements

Delivery partners will work with producers to develop management plans and necessary infrastructure specific to the producers goals.
